AARDWOLF O-THREE prepares for Pandemic

William (Bill) L Vetter, President and CEO of Bio3X LLC, a leading bio-security company in the US was in Singapore to ensure that the complete range of anti-microbial sanitisation equipment is in tip-top condition. This technology is licensed exclusively to Aardwolf O-three in Singapore.

“I want Aardwolf O-three to be fully prepared for the next flu pandemic. Your priority should be to protect your staff and their family, so that your staff can carry out the treatment to help all your existing Clients” advised Bill.

Deep in concentration were Anuar bin Rozali, Mohd Nazree bin Suhaimi and Sam Ngo as they understudied Bill Vetter.
